

Terry Beatley – BIO

Journey with Terry Beatley on this nine year odyssey of fulfilling her promise to carry forward the pro-life mantle of Dr. Bernard N. Nathanson. He was the doctor once known as America's "Abortion King" who founded NARAL Pro-Choice America and trained Planned Parenthood doctors.

In a rare interview in 2009, Terry met with the "Keeper of the Abortion Industry Keys," when he was 83 years old and terminally ill. Dr. Nathanson instructed her to teach the 8-point-strategy, including NARAL's stealthy "Catholic Strategy," of how he deceived America with the lie that abortion is women's healthcare. In addition, she promised to deliver his personal parting message across America to "stop the killing because abortion is not love."

Detailing the Catholic Strategy to how NARAL manipulated the Supreme Court, legislators, medical and clergy community, and the public, Terry's presentation keeps listeners on the edge of their seat as she uncovers this rarely discussed part of American history—the truth that Dr. Nathanson left behind. Securing the movie rights for Dr. Nathanson's literary works, Terry is currently working toward two feature films and speaks across the nation.

She is President of Hosea Initiative, (www.hosea4you.org) a non-profit educational organization dedicated to using the story and legacy of Dr. Bernard N. Nathanson to teach the principles of American liberty, beginning with the right to life so that America is free from abortion.

As a former investment advisor who turned homeschool mom for seven years, her "yes" to God motivates prolife, Christian and political audiences to respond to the needs of the hosting organization: to mobilize more volunteers, to stand strong, to donate, to believe through faith and action that life will unite our fractured country.
